| Date: | November 9, 2020 |
|----------|--|
| То: | Members of the Advisory Committee |
| From: | Steve Schmidt, CPM |
| Subject: | Southwest Crestview Bypass Funding Summary |

STATEMENT OF ISSUE:

Comprehensive funding source and expenditure tracking for ST000009, Southwest Crestview Bypass.

BACKGROUND:

In order to keep track of funding sources and projected expenses for this bellwether surtax project, a comprehensive spreadsheet was created to provide an overview of all phases of the project and a tool to adjust and track changes. The top section identifies the funding entities and details the funding sources. The lower section identifies allocations and expenditures for each phase and category of the overall project. For information on the expected allocations of county funding for each activity, see the parenthetical numbers in the Okaloosa County section of the (top) funding source and their correlation in the notes section of the (bottom) allocations and expenditures.

The report is updated to reflect expenditures processed through November 4, 2020. It has been revised to a "zero balance" report, with the TIF funding fluctuating to maintain the zero "Balance of Funds" total. This elimination of the previously significant shortfall was possible due to the receipt of a CEI Task Order from HDR that was below projections and a very positive low bid from Anderson Columbia Co., Inc. for the construction of Phase V and E-W segments of the project.

Funding Summary

t of the overall program includes multiple projects that will be designed and constructed by either Okaloosa County or by the FDOT.

Latest Revision: 11/4/20

This is a forward-looking budget estimating document. As such, it is subject to frequent and possibly significant changes, and it should not be relied upon for either categorical or overall final estimates of costs for the project.
